

PHILIPPINE SCIENCE HIGH SCHOOL-WESTERN VISAYAS CAMPUS
Annual Report for 2012
Message from the Office of the Campus Director

“Bente: Dalawang Dekadang Paglinang ng mga Siyentipikong Pilipino”. This is the theme of this year’s Foundation Day celebration as 2012 marked the 20th year of Pisay Western Visayas Campus in its quest to hone Filipino scientists.

Several challenges confronted the year 2012 including the leadership transition, the first year of the K-to-12 curriculum implementation, and classroom relocation of scholars to give way to the repair and rehabilitation of the Academic building. These challenges were welcomed as opportunities to grow, improve, dream bigger and get more excited for greater things in store that go with change embraced with a positive spirit.

Unshaken by the challenges this 2012, PSHSWVC continued to keep its culture of excellence in terms of accomplishments highlighted in this year’s Annual Report. These achievements are results of the concerted efforts of all the members of the Pisay WVC family- the gifted scholars, competent faculty and staff, and the very supportive parents through the General PTA and the re-established Dorm-PTA. As the new Campus Director, it is with great joy and honor to present this year’s achievements of our scholars and mentors as evidences that WVC indeed has been faithfully true to its Mission and Vision.

We take pride as our scholars bagged recognitions and awards in several competitions held in local, national and even international scenes that affirmed our scholars’ global competitiveness. Similarly, our teachers also pursued their quest for excellence this year as a good number of them earned their Ph.D. and Master’s degrees , and embarked on opportunities to be competitively qualified to attend a short-term training and get scholarships abroad.

The year brought a lot of “firsts” in Pisay: mall exhibit, budget planning workshop in the campus level, Homeroom Mentoring program-pilot implementation, and official launching of the Alternative Learning Activities (ALA), to mention a few.

We have also opened ourselves to go beyond our comfort zones, as we continued to do beyond our usual outreach programs , as we collaborated in successful partnership with DepEd for the UPLIFT program, with DOST-SEI and Regional Office for the Mentoring Program, and with DOST and UP Diliman-College of Engineering for the Project Language Database Program. We also have widened our networks and linkages increasing our number of benefactors granting financial assistance to our increased number of scholars as recipients.

Amidst all the challenges and victories, PSHSWVC has established itself as a place where scientific minds and humanistic hearts meet and blend this year 2012.
